INSTALLATION AND USAGE

The installation of WooCommerce Return and Warranty is very simple. If you have previously installed any WordPress plugin, installing this will be the same as well! Yes, WooCommerce Return and Warranty is a WooCommerce extension, so you need to install and activate WooCommerce on your site.

Once you have installed and activated WooCommerce in your system, now install this plugin and activate it. If you do not have WooCommerce installed on your system, this plugin won't work and will show an error message.

How Does This Plugin Work?

After activating your plugin, you will notice a sub-menu named “Return Request” in your dashboard. This sub-menu expands into two pages “Requests” and “Settings”. The Settings has three tab options – General, Default Warranty, and Frontend.

On the General tab in the Settings page, there are two groups – Order Status to Allow Warranty Request and Returned Status. “Order Status to Allow Warranty Request” allows you to set a condition, for which your customer will be eligible to make a warranty request. “Returned Status” shows the status of a new request. New requests will be termed “New”.

On to the Default Warranty tab, you can set Label, Type, and Add-On Warranty. Label carries the name to show in place of Warranty. Type has three options – No Warranty, Warranty Included, and Warranty as Add-On.
